### Abstract

The abstract should not be more than 500 words. The abstract should not only indicate the subject and scope of the paper but also summarise the author's conclusion. A structured abstract must be a brief, comprehensive summary of the contents of the study. It allows readers to survey the contents of a study. An abstract summarises the major aspects of a paper. It should succinctly summarise the purpose of the article, the methods used, the major results, and the conclusions. (**Times New Roman 10**)

### Introduction

This format is to be used for submissions of extended abstracts that will be published in the conference proceedings. We wish to give this proceeding a consistent, high-quality appearance. Therefore, we ask that the authors follow some simple guidelines. In essence, you should format your paper exactly like this document. The easiest way to do this is to download a template from the conference website and replace the content with your material. In this section, the author should address the following information. Introduction, background of the research, and research objectives.

### Materials and methods/Methodology.

The extended abstract should be written in MS Word format in single-spaced 10-point Times New Roman except for the abstract (10-point Time New Roman). Do not indent the text paragraphs. Please briefly explain the aim and scope of the study, the materials and methods. and the main findings and brief analysis of the study.

### Results and discussion

In this section, the authors should address the following information: findings/results and discussion.

### Conclusions

The conclusion is intended to help readers understand why your research should matter to them after reading the paper. A conclusion is not merely a summary of the main topics covered or a re-statement of your research problem but a synthesis of key points and, if applicable, where you recommend new areas for future research.
